# Who are IPBRA?

**IBPRA was created as a way to ensure that you get what you pay for** when it comes to personal assessments. The process of certifying a test is simple, all tests certified by IBPRA must have:

- ⊕ **A STATISTICALLY SIGNIFICANT SAMPLE SIZE**
- ⊕ **RESULTS THAT EVOLVE AS MORE DATA IS ANALYSED**
- ⊕ **QUESTIONS WITH A CLEAR ACADEMIC AND PSYCHOLOGICAL BACKING**

Founded in 2021 by Louis Lawrence and supported by Nate Chai, IBPRA was built from the frustration today's world of capitalist-money-grabbing self-worth tests that are designed primarily to make the users feel good about themselves.

## What do we do?

***Lorem ipsum dolor sit amet, consectetur adipiscing elit***, sed diam nonummy nibh euismod tincidunt ut laoreet dolore magna aliquam erat volutpat. Ut wisi enim ad minim veniam, quis nostrud exerci tation ullamcorper suscipit lobortis nisl ut aliquip ex ea commodo.

Duis autem vel eum iriure dolor in hendrerit in vulputate velit esse molestie consequat, vel illum dolore eu feugiat nulla facilisis at vero eros et accumsan et iusto odio dignissim qui blandit praesent luptatum zzril delenit augue duis dolore te feugait nulla facilisi.

Et iusto odio dignissim qui blandit praesent luptatum zzril delenit augue duis dolore te feugait nulla facilisi.

# What is IQ?

**At its core, IQ is a measure of your ability to reason.** What makes IQ so unique is that it basis itself off of all the previous scores achieved on that particular assessment (with the aim to make 100 the most common score) and variations of an IQ test are used to determine:

- ⊕ **A A PREDICTION OF HOW WELL A CHILD WILL PERFORM ACADEMICALLY**
- ⊕ **R THE EFFECTIVENESS OF ADHD TREATMENTS**
- ⊕ **Q HOW EFFECTIVE A POTENTIAL EMPLOYEE WILL BE**

Despite being so widely used, IQ has become a controversial subject with one of the main criticisms being that it isn't a good predictor of success.

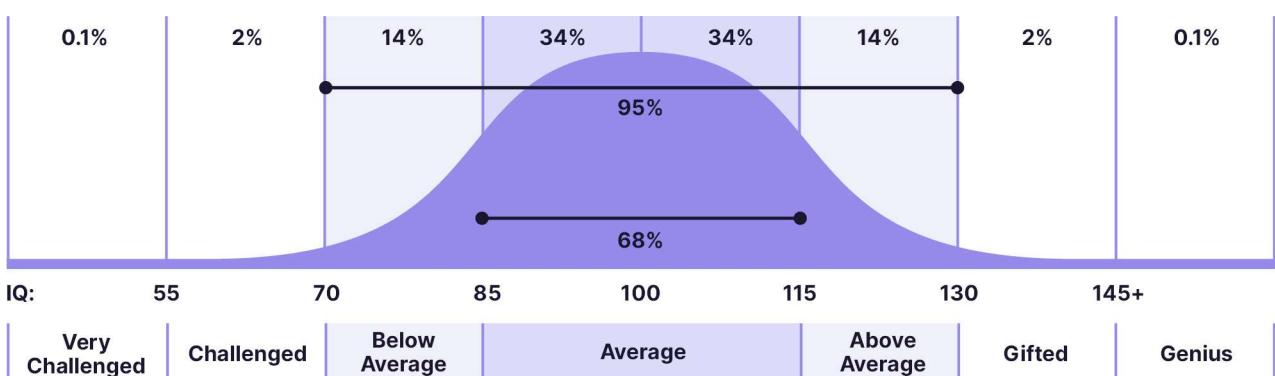

We agree.

## How is IQ worked out?

**Once you've answered the IQ Test questions** your results are compared with data from other participants in your age group who have already taken the test and then a normalized score is calculated.

Normalizing means the average IQ score is 100. Your score will show where you stand compared to other peers in your age group who have taken the test. IQ scores follow a normal distribution of statistical data. Approximately 95% of the world's population have scores within two standard deviations (SD) of the mean (average IQ score), meaning that 95% of the population stand within a range of 70 to 130, and 98% are below 131.

IQ points are not percentage points. While one standard deviation is 15 points, and two SDs are 30 points, and so on, this does not imply that mental ability is linearly related to IQ, such that IQ 50 means half the cognitive ability of IQ 100.

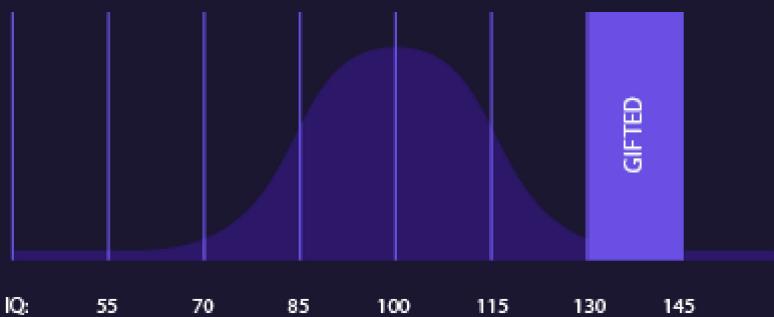

# Overall Summary

Overall IQ

# 142

An IQ of 142 puts you in the **gifted** category.

This is higher than approximately **98%** of the general population.

Verbal

# 130

An IQ of **130** puts you in the **gifted** category.

Non-Verbal

# 80

An IQ of **80** puts you in the **average** category.

Verbal

# 130

An IQ of **130** puts you in the **gifted** category.

Non-Verbal

# 80

An IQ of **80** puts you in the **average** category.

Your Intelligence Type is:

# The Wizard

V SP NV M

A master of conjuring, your ability to weave words and keen understanding of the material world means that you can create anything you imagine. Unlike The Engineer (whose Major Intelligences rely on a Numerical understanding), your verbal ability gives you freedom from the physical plane and allows you to make the “impossible” possible.

## “your verbal ability gives you freedom from the physical plane”

★ Your keen understanding of how the physical world works means that you can mentally build something and then use your Verbal reasoning to explain the idea to life. Whilst it may seem magical to others, they can't see the depth of the mental construction and your ability to express it means that it's simple for others to understand your vision.

★ With your Minor Intelligences in Nonverbal and Numerical , be careful that whilst your concepts may make physical sense, the world may not be ready for them. Pair yourself with a strong Nonverbal thinker that shares your Spatial ability (like The Designer or The Alchemist) to make sure that your concept is desired in the real world.

★ As a Wizard you are well suited to creation of physical objects. Use your Verbal reasoning to lead and manage the projects that inspire you. It's also worth learning to augment your Major Intelligences with design tools to help bring your visions to life.

★ Whilst you have a natural sense of space, make sure that when you translate that idea to the physical world you double-check your numerical data (such as measurements). Similarly, it's worth spending some time thinking about the logic behind your concept; who is it for? What's the need? How many people will this benefit?

## BREAKDOWN ANALYSIS

# Verbal Intelligence

Verbal Intelligence is the ability to use language to solve problems and analyse information.

### How is Verbal Intelligence used in daily life?

You use your verbal intelligence whenever you engage the language centres of your brain. This can be used for simple tasks like reading signs, to more complex tasks like giving an oral synopsis of a written report.

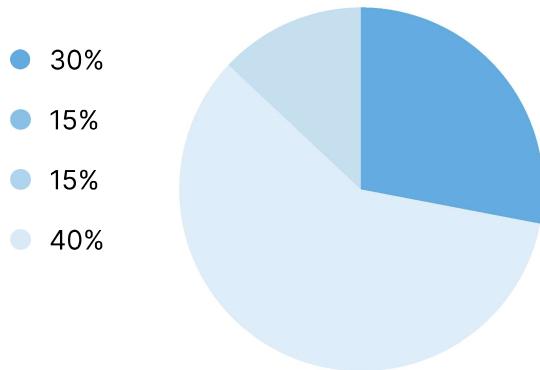

Those with a high level of Verbal Intelligence are typically found in roles that require the ability to communicate complex ideas, to understand and parse a lot of written material, and to express themselves using language.

### Key Strengths

Reading, Writing, Speaking

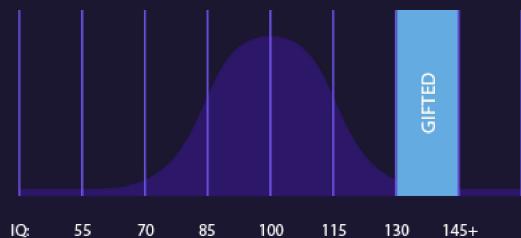

### Statistics in Verbal Intelligence

#### 1.2 Score Distribution

## You Scored

8 / 142  
12

A score of 8 translates to an IBPRA IQ of 120 and puts you in the **gifted** category for **verbal intelligence**.

This is higher than approximately **98%** of the general population..

## BREAKDOWN ANALYSIS

# Non-Verbal Intelligence

Sometimes called “abstract reasoning,” your Non-Verbal Intelligence is engaged when solving problems presented as a diagram or pictorially.

### How is Non-Verbal Intelligence used in daily life?

Your Non-Verbal Intelligence is activated when presented with non-language based visual information (such as a map, or furniture building instructions). It is also used when trying to understand abstract concepts that are subjective such as morality or ethics.

With high Non-Verbal Intelligence, you’re best suited to solving problems that involve using logic or “common sense”. Those that score highly in Non-Verbal Intelligence are also suited to explaining diagrams and integrating those systems into the physical world.

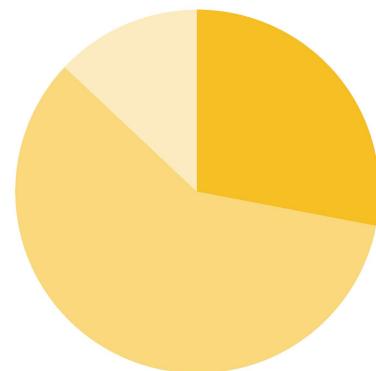

### Key Strengths

Pattern Recognition, Understanding Diagrams, Outcome planning

Statistics in Verbal Intelligence

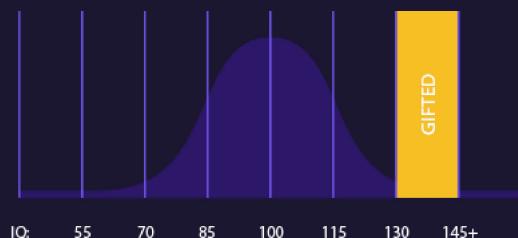

### 1.2 Score Distribution

- 30%
- 15%
- 15%
- 40%

## You Scored

**8 / 12** **142**

A score of 8 translates to an IBPRA IQ of 120 and puts you in the **gifted** category for **verbal intelligence**.

This is higher than approximately **98%** of the general population..

## BREAKDOWN ANALYSIS

# Numerical Intelligence

Numerical Intelligence is the ability to use numbers and data to solve problems and analyse information.

### How is Numerical Intelligence used in daily life?

Unsurprisingly, your Numerical Intelligence is activated whenever you have to deal with and make decisions based on numbers. One of the most obvious examples of this is when making a purchasing decision, you use your Numerical Intelligence to make a value judgement of a new trinket.

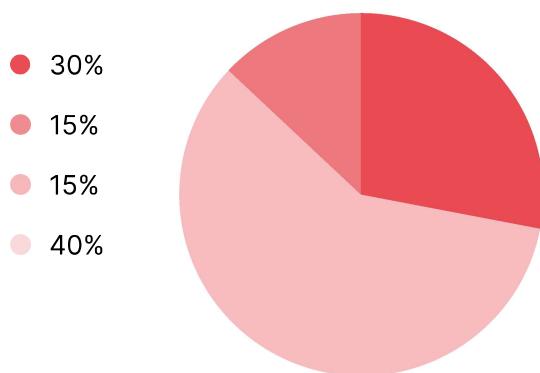

A high Numerical Intelligence is essential for those that want to solve scientific problems or any tasks that require the use of numerical data to prove a solution.

### Key Strengths

Maths, Statistical Analysis, Raw-data Processing

### Statistics in Numerical

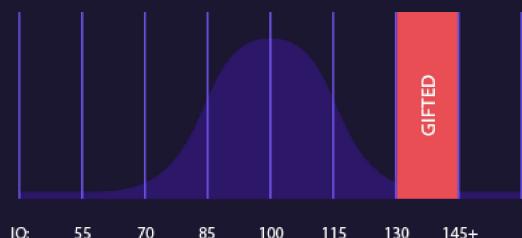

#### 1.2 Score Distribution

## You Scored

**8 / 142**

A score of 8 translates to an IBPRA IQ of 120 and puts you in the **gifted** category for **verbal intelligence**.

This is higher than approximately 98% of the general population..

## BREAKDOWN ANALYSIS

# Spatial Intelligence

Spatial Intelligence is the ability to understand physical and mechanical systems and mentally visualise complex 3D constructs.

### How is Spatial Intelligence used in daily life?

When you try and imagine how something will look (such as new clothes or furniture) you're activating your Spatial Intelligence. Similarly, it's activated when you're trying to navigate spaces, remember where you are, and know where you're going.

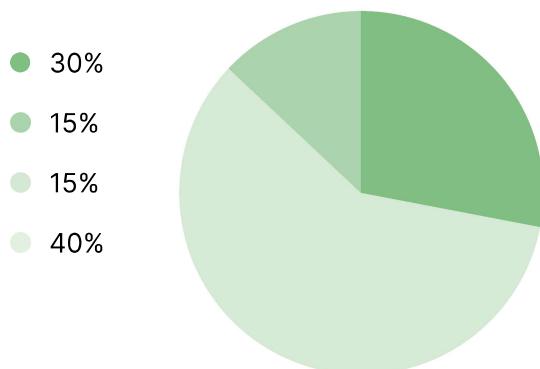

Those with high levels of Spatial Intelligence are likely to find themselves solving problems that require them to mentally build models and then create those models in the physical world, such as an Architect or Chemist.

### Key Strengths

Navigation, Design, Construction

### Statistics in Spatial

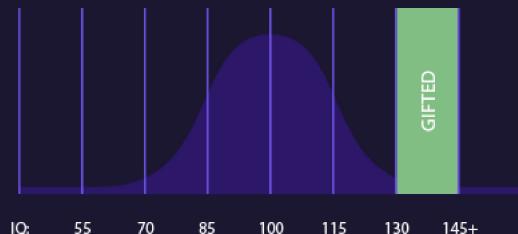

#### 1.2 Score Distribution

## You Scored

**8 / 142**

A score of 8 translates to an IBPRA IQ of 120 and puts you in the **gifted** category for **verbal intelligence**.

This is higher than approximately 98% of the general population..
